

# Scout

## DESCRIPTION

Introducing Scout, the new member of our pack. A multi-purpose family of seating, built around a lightweight but rigid polypropylene shell, Scout is shaped for comfort and designed to delight.

Prepared for any environment, Scout offers a variety of supporting structures ensuring a wide diversity of applications - from waiting rooms to reception rooms, bedroom desks to meeting spaces, short duration work chairs and conference halls. Versatile and flexible, Scout delivers real choice. Without the fixed, upholstered seat pad, Scout has an easy wipe down surface, crucial where good hygiene is a consideration. Adding the seat pad opens up an array of opportunities to colour co-ordinate fabrics with the plastic shell and the wider environment.

Whichever way you configure Scout, it promises a superior seating experience.
